WEATHER OF CONCERN

Weather of Concern

- Showers will continue across Northern California through Tuesday with a chance of thunderstorms Tuesday afternoon.
- **Active Weather Warnings, Watches and Advisories by County:**
- http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php - Temporarily unavailable.
- <https://alerts-v2.weather.gov/counties/CA>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

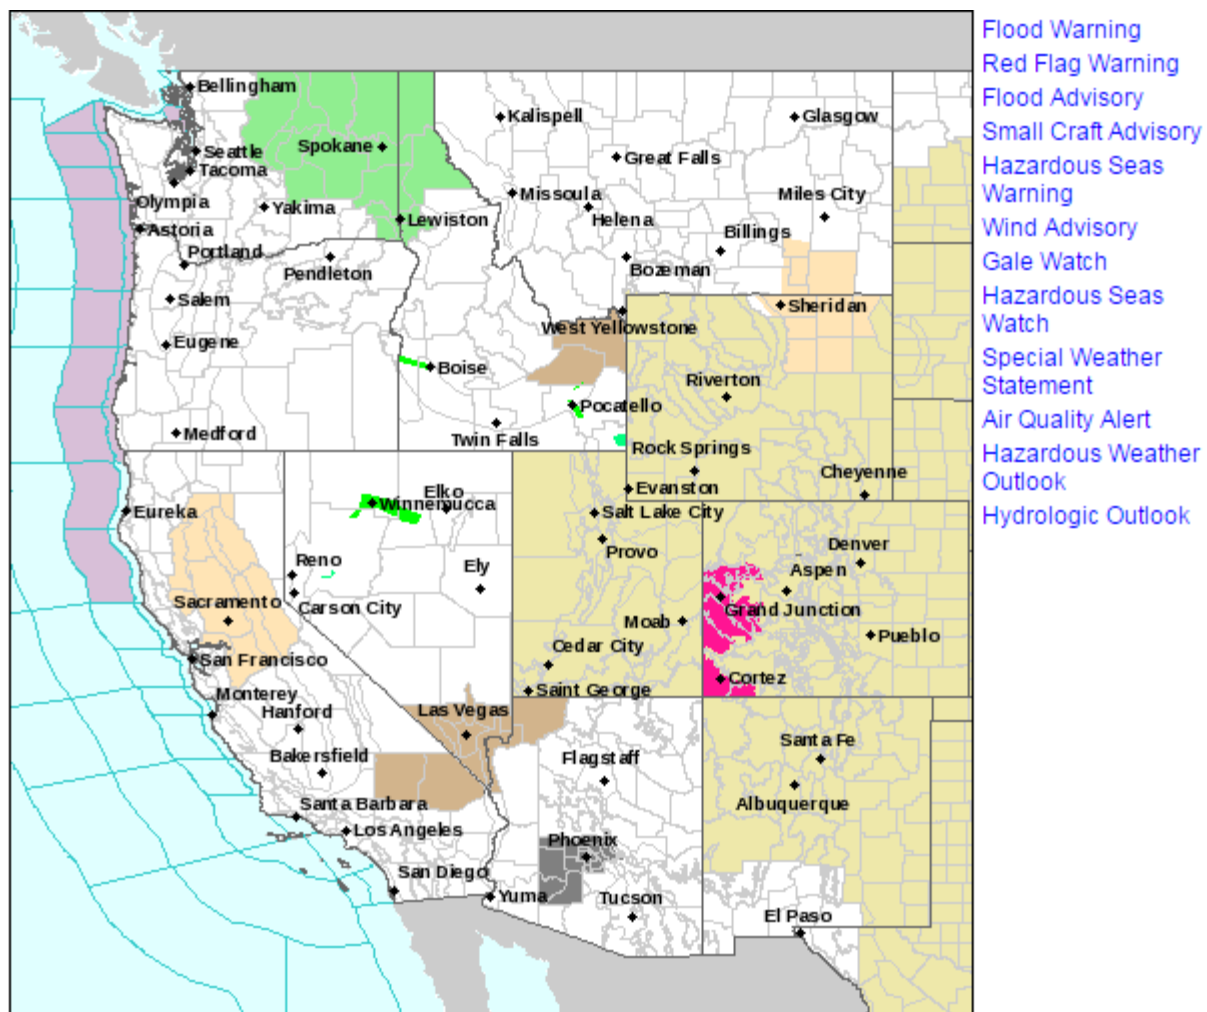

There will be a few Pacific weather systems move through the region over the next few days, so expect unsettled weather with periods of precipitation through Thursday. The wettest periods across the region appear most likely to be tonight and Wednesday night at this point. Some locations will have gusty southerly winds at times associated with these weather systems, mainly over the northern half of the region. High pressure and dry weather will be over the region Friday, and Saturday the southern edge of a system passing by to our north will bring some cloudiness to the region, but no precipitation is expected from it at this time. High pressure and dry weather with a little above seasonable temperature will be over the region Sunday and early next week. Some gusty northerly winds may develop later Sunday into Monday in the favored areas. Afternoon highs Friday through the weekend will be in the mid and upper 70s in the warmest inland areas.

SOUTHERN CALIFORNIA

A storm moving inland into the Pacific Northwest will bring scattered showers to Central California through Tuesday afternoon. Most locations will receive between a quarter inch and a half inch of rainfall, but the Central Sierra and its surrounding foothills will receive between a half inch and two inches of rainfall. The snow level will be above 8,000 feet. Southern California will receive little or no rainfall from this storm. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the mountain ridges and desert passes through Tuesday night and then west to northwest winds with the same speed will return to the wind prone areas Wednesday evening through Thursday afternoon. Zonal flow into Central and Southern California will bring near to a little above normal temperatures through Thursday. Maximum temperatures will be in the 50s to low 60s across the mountains and upper 60s and 70s in the valleys today. Minimum humidity will be above 20% away from the deserts through Thursday. A strong ridge of high pressure will build into California from the Pacific bringing well above normal temperatures and minimum humidity in the single digits and teens Friday through this weekend. Temperatures will warm into the low 90s across the warmer valley locations of Southern California. Northerly winds of 20 to 30 mph with gusts to 50 mph will surface across the South Coast of Santa Barbara and the Grapevine Thursday night. Winds will become northeast to east 15 to 25 mph with gusts to 40 mph and be focused over the mountains and below the canyons and passes of Southern California Friday morning into the early afternoon hours. Winds will become light across the entire region Friday evening through this weekend.
